Franmar’s Plastisol Ink Remover eliminates the use of mineral spirits and other volatile solvents while saving you time and money! Plastisol Ink Remover was the first product introduced by Franmar to replace the caustic, toxic, high odor products, and at a fraction of the cost. Plastisol Ink Cleaner effectively cleans screens without the odor and is drain safe. Low VOC and 100% biodegradable, this ink remover reduces the hazards of screen reclaimation to workers and the environment!

**Directions**

1. Spray or pour a minimal amount onto screen.
2. Scrub screen with dedicated Biggee™ pad or nylon brush.
3. Repeat on back of screen image.
4. Rinse both sides of screen clean with pressured water.

**Note:** Plastisol Ink Remover does not evaporate. A water rinse or cleaning with a damp shop towel is necessary to remove the oil residue.

**Usage Tips**

- Less is more! Control amount by using a spray bottle. Six or seven (6-7) sprays is all that’s needed to clean a standard size screen.
- Use a dedicated Biggee pad for each solvent to avoid mixing products and extend the life of the pad.
- Pressure washing facilitates a clean screen.
